BRIGHT-LIPS TIPS AND TRICKS

- "You know you've found the right shade when it enhances your skin tone, makes your eyes look bigger and gives your face a lift," says Bobbi Brown's head of artistry, Paul Hemmgen.
- "Extreme brights can look like on black skin," says Karen. "Wipe the colour sheer or talcified so it has some shimmer to it."
- "The brighter you go on the lips, the more simple the rest of your makeup should be," says Karen.
- "Brights can drain the skin, so always wear it up with some soy (blue), and make sure you cover up stemlines and dark circles," advises Kay.
- "To find your perfect pink, match it to your gums," says Chase.
- "Bubblegum shades are best teamed with a rosy blush, not loads of oranges and eye makeup. Unless you want to look like a clown," says Karen.
- "Red with blue undertones (like cherry) make teeth seem whiter. But blue-based pinks (such as bubblegum pink or fuchsia) play up any yellowing, so avoid if your teeth are off-white!" says Cosma's Beauty Director Ingeborg van Lotringen.
- "To get the exact colour you see in the tube, first fill out your lips with a flesh-toned lipliner to 'neutralise' any pigment in them," says Chase.
- "Perfectly lined and pulled-back lips have a retro, 'Mad Max' feel," says Poppy. "Loud colour slicked on straight from the tube is more modern-looking."
- "To keep yourself from bright lips, apply a clear slick balm and dab a high-shimmer lipgloss on top with your finger," suggests Chase.
- "Then by a little more colour each time."
- "To keep things modern, never match your lipstick with your nail polish or your outfit," says Paul.

Pink punch

PORCELAIN SKIN

"Bubblegum pink, magenta or other pinks with a lot of white work best on porcelain skins," says Myface cosmetics creative director Kay Montano.

GOLDEN SKIN

"Choose a vibrant, candy-stripe pink or a '60s baby-doll coral pink. Bluish or silvery pinks can look ageing on golden skin," says Karen.

L'Oréal Paris Color Riche Lipstick in Pink Fever, £8.16
Barely M Lip Paint in Peachy Pink 147, £4.49
